

## Reception Service for Major Investors

Major investors thinking of relocating to, expanding in or developing space in Bristol can benefit from the Reception Service provided by Bristol City Council's Marketing, Investment and Enterprise Team. This Reception Service provides support tailored to each investor's needs.

### Reception Service for Major Investors:

- Help to find sites or property
- Information to support the development of a business case
- Help to link to key networks and agencies covering a wide range of subject areas, such as - for example - recruitment, skills and training
- Providing links to Planning and other key Council departments to help make your investment successful.

The Reception Service is part of a suite of services that Bristol City Council is developing to encourage, facilitate and support major investment in the city. Other elements include:

- The Planning Protocol: This provides a clear protocol for applicants and Bristol City Council to work together to effectively process major planning applications. This is led by Bristol City Council Development Control Service
- Investor Development Service: Bristol City Council has developed a new "aftercare" package from major investors in order to build a long-term relationship and to ensure your move is successful.

**"Already recognised as an internationally competitive city, together we are determined to deliver our ambition for Bristol to be even more successful in the future. The key to realising our city's vision will be providing investors with high quality, timely support when they need it. Our Reception Service aims to do exactly that."**

Councillor Helen Holland, Leader, Bristol City Council.
